WHAT ARE THE BENEFITS OF A SMART HOME OS?

A smart home operating system (OS) is a software and hardware system that connects the many different types of technology in your home into one easily accessible platform. The Control4 Smart Home OS enables you and your family to control nearly every device and service in the house in ways that are easy and fun to use.

Control4 Smart Home OS
State-of-the-art smart home access and control you can depend on and easily operate.

Consolidates your home technology into one interface, syncing your favorite home technology brands and devices to work together

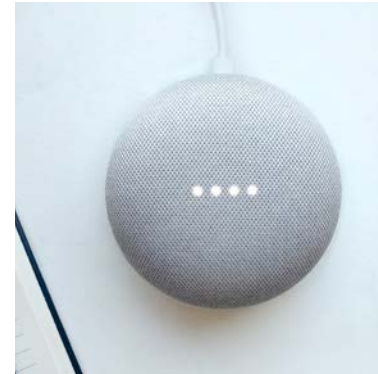

Connects you to control your entire home, from anywhere

Performs the whole-home automation scenes you create

Alerts you with custom home notifications

Offers secure touchscreen, remote, keypad, voice, and app access to home

ENJOY ALL THE WAYS YOU CAN ACCESS YOUR CONTROL4 SMART HOME

CONTROL4 & YOUR FAVORITE BRANDS

We all have certain technology products or brands we love—whether it's a favorite doorbell camera, music app, or a voice control device. Unlike some smart home systems, the Control4 Smart Home OS is an open platform, which means that many of the smart products and services you already own and love are compatible with Control4 products and can simply connect into the system.

Control4 enables you to keep those brands and devices you already own and simply connect them together via one single control system. When you connect a single smart device into a Control4 system, that device can suddenly do so much more!

WE ARE HERE FOR YOU

Control4 Smart Home Professionals can also help you learn about new brands and devices that will work with Control4 and your existing products—making your smart home possibilities almost endless.

Control4 Smart Home OS connects to devices of all types.

- Sprinkler Systems* 
- Blinds and Shades* 
- Home Cameras* 
- Pet Doors* 
- Plumbing and Faucets* 
- Voice Command Devices* 
- IoT Devices* 
- Smart Kitchen Appliances* 
- Thermostats and HVAC* 
- TVs and Speakers* 
- Smart Door Locks* 
- Fireplaces* 
- Music Apps* 
- Floor Heating Systems* 
- Garage Doors* 
- Smart Washers and Dryers* 
- Gate Access and Monitoring* 
- Pools and Spas* 

CONNECTING SECURITY

Control4 works with your most trusted security brands, protecting you without compromise. Stay connected to your home anywhere in the world with real-time home notifications, live security camera footage, doorbell alerts, mobile app home access and control, and more.

OUR CUSTOMERS LOVE TO

SOME OF OUR FAVORITE SECURITY PARTNERS

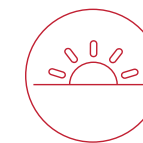

Arm/disarm the entire security system via the mobile app

Receive alerts when a door or window is opened

Have blinds automatically close when no one is home and open when someone arrives home

Set lights to automatically turn on at dusk

Receive a notification as soon as each child enters their unique code to unlock the front door

Set a scene so all lights in the house turn on when the alarm is triggered

CONNECTING ENTERTAINMENT

When you connect your TVs, speakers, and other entertainment devices to your Control4 home automation system, you can create an experience that takes your breath away. From a single speaker to an entire home theater system, get the entertainment setup you want with all of your favorite devices working together.

TRIAD

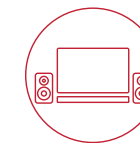

Turn on music in one room or the whole house from a single remote, touchscreen, keypad, voice command, or the Control4 app

Control a favorite gaming console with a Control4 remote

Stream video from the front door camera to the TV when someone rings the doorbell

Set a TV to turn on at a certain time of day or when a particular show comes on

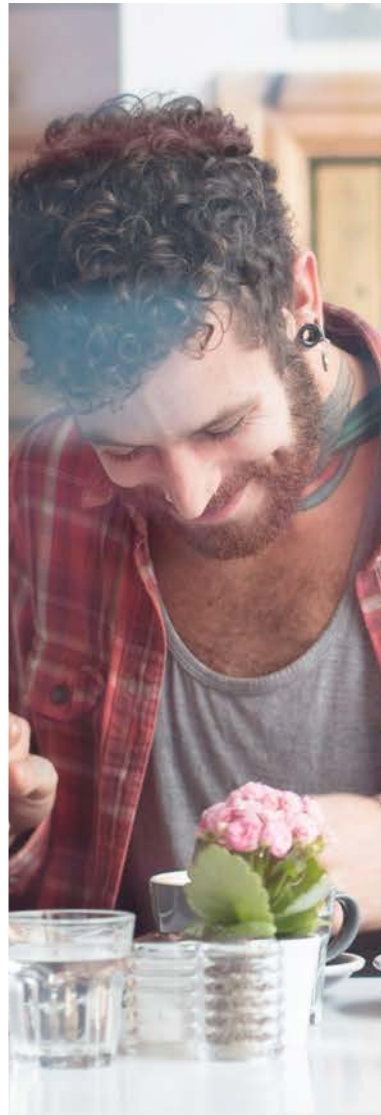

Set a scene so when the TV turns on, other audio in the house turns off, the lights dim, and shades lower in the room

Turn on all TVs in the home to a specific station at once, and then turn them all off with the push of a button

CONNECT WITH HOMEOWNERS

Controlling millions of devices in homes around the world, the Control4 Smart Home OS connects families to what matters most—their homes. Control4 has been providing quality whole-home automation for decades, and we've got our customers talking.

"We own a vacation home and enjoy knowing that if any water leaks, unwanted motion detection, or extreme temperatures are detected in the home, Control4 immediately sends a notification to our phones."

— **Audrey & Keith B.**
Control4 Homeowners

"I enjoy waking up to the smell of fresh coffee brewed automatically at sunrise every morning, along with the Sharp TV turning on to my favorite news station at a particular time every weekday—excluding holidays!"

— **Daren A.**
Control4 Homeowner

"I feel great peace of mind knowing that if there is any motion around my pool area or if the pool cover is opened, I will receive an audio alert via my home's touchscreen panels."

— **Jaren C.**
Control4 Homeowner

CONNECTING COMFORT

Creating a comfortable space is simple when all your smart devices are working together. From temperature control to shading, Control4 enables you to sit back and enjoy a comfortable and inviting home that delivers energy-efficient climate control.

Have the shades automatically go up or down depending on the time of day

Connect the HVAC to turn on and off automatically depending on the outdoor temperature reported that day

Automate connected devices to help regulate home temperature

Adjust home temperature from anywhere with remote access

Have a keypad or touchscreen turn red to notify you if a door is left open

Program the system to enter energy-saving mode when no one is home

CONNECTING LIGHTING

Smart lighting goes far beyond beautiful switches and dimmable bulbs. Smart lighting works with most lighting already in the home—connecting it to the Smart Home OS through a programmable smart switch. It provides energy efficiency, added safety and security, and multiple custom lighting scenes, and it can control more than just your lights.

Control4 offers an elegant line of smart lighting products for your entire home. You can even start with one room and add more smart lighting over time to your existing system—the choice is yours.

Control4 Smart Lighting
Explore the many options available to create a smart lighting sanctuary across the entire house or in just a few select spaces.

Set specific lights to turn on automatically when the front door is unlocked

Turn lights on and off remotely with the Control4 App

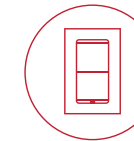

Have an all on / all off lighting setting to quickly control all the lights in the house

Set the lights to all turn on automatically if the alarm is triggered during the night

Preset different lighting scenes for the kitchen, with one button making it bright for cooking and another button adjusting the lights for mood lighting and turning on soft music for entertaining

Have a single light switch programmed for the entertainment room, so when it is pressed, the lights dim, shades lower, music turns off, and the TV turns on

CONNECT WITH HOMEOWNERS

“We love that our son has quick, easy, and secure access to his favorite shows (Nick Jr, Disney+, etc.). Shows can be favorited to the room view, which makes it great when he gets up at 6 a.m. and we’re a little slow to get out of bed.”

— Heather & Tyler F.
Control4 Homeowners

“I’ve connected my Genie HD DVR into the Control4 system, so that when the doorbell is pressed, a video pops up on the TV, which streams the front door camera to show me who’s there.”

— Marissa D.
Control4 Homeowner

“I love that I can program my Control4 system to automatically lower the blinds only when the sun is coming through certain room windows to protect my art I have in those rooms.”

— Roger P.
Control4 Homeowner

“When we are done watching TV, our Samsung television is programmed to display digital artwork instead of it just turning off into a blank square on the wall. We even have it programmed it to display themed artwork on holidays. It makes the room look so much better!”

— John & Taylor W.
Control4 Homeowners

CONNECTING VOICE

With Control4 and your favorite voice control devices connected together, you can tell your house what to do and it listens—whether it's turning off all lights when it's bedtime, setting the perfect mood for dinner, or asking for a helping hand when yours are full.

OUR CUSTOMERS LOVE TO

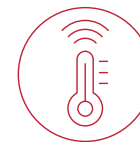

SOME OF OUR FAVORITE VOICE PARTNERS

amazon

Voice Control

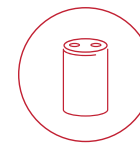

Using your favorite voice-control device, you can control a specific smart home device, a few devices simultaneously, or your entire Control4 Smart Home with just your voice.

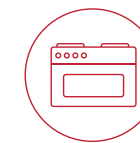

Tell the home to turn down the temperature

Connect the Control4 system to the front door to open it with just a voice command for wheelchair-bound family members

Adjust the home with voice commands such as “Alexa, turn on family room TV” or “Hey Google, dim the theater lights to 40%”

Use a voice command to turn off the oven when the timer is going off—no matter where someone is in the home

Provide voice commands for house guests so they can also easily activate music, turn on or off multiple fixtures at once, lock doors, or adjust the temperature

Quickly put the house to sleep at night with a “Goodnight” voice command

CONNECTING APPLIANCES

Having a smart appliance is great, but having a smart appliance connected into a Control4 system is even smarter. With Control4, you can connect devices such as your smart coffee maker, stove, refrigerator, washing machine, pool controls, and more to give you better access and control of your home.

Third-Party Devices

Control4 works with tens of thousands of third-party devices—and that number is rapidly growing. So you can count on your Control4 system controlling virtually anything and everything in your home.

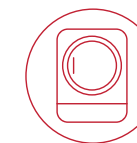

Have the coffee maker automatically start brewing at sunrise each day

Have the refrigerator send a push or voice notification when the door is left open

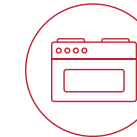

Set a scene to automatically control multiple appliances throughout the home at once

Receive a reminder through the speakers in the home to move the laundry

Get a push notification when the rinse-aid level is low in dishwasher

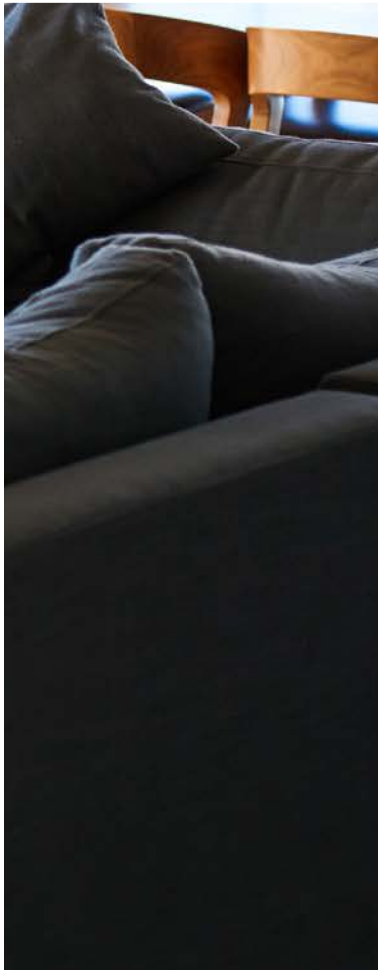

Control and start the oven remotely, so that the meal is ready when the family arrives home

CONNECT WITH HOMEOWNERS

“My kids often leave lights on around the house, and so I have my smart lighting set to automatically turn off the basement lights and closet lights if motion isn’t detected for 10 minutes, helping me save energy and money.”

— **Kim H.**
Control4 Homeowner

“I love how my Kwikset door lock and Control4 system are set so when I enter my code to unlock the front door, the lights on the main level turn on—but only if it’s sunset or nighttime. If it’s before sunset, the home starts playing my alternative rock playlist over select speakers. However, if it’s after sunset but before midnight, the home is programmed to start playing a more relaxing, post-work playlist.”

— **Jacob J.**
Control4 Homeowner

“We love never having to turn around to check if the lights were left on, front door was left unlocked, or the garage door was left open—we can simply check and control all of those things from our secure Control4 app.”

— **Karla & Albert R.**
