

SMART ENTERTAINMENT SOLUTIONS

The Ultimate Audio & Video Experience

Control 

SMART SOLUTIONS

for Home Entertainment

Control4 creates the ultimate audio/video experience—in one room or every room, no matter the size of your home. Experience the latest 4K movies, stream high-resolution music, enjoy your favorite sporting events, or create an unbeatable home theater experience.

Technology disappears and you simply interact with your favorite movies and music from an easy-to-use, intuitive Control4 interface, such as a hand-held remote, tabletop touchscreen, the phone in your pocket, or with the simplest interaction method of all—your voice.

One-Room Entertainment **SIMPLIFIED**

Limitless entertainment with a single remote

Whether you're updating a family room or a dedicated home theater, Control4 has the ideal entry point to your smart home. With a single remote, you can control your entire entertainment system, with the ability to add control of the entire home.

All of your content is at your fingertips, from Blu-ray movies to satellite TV, all in stunning, 4K high-definition video and surround sound. Watch video from multiple sources, including media players, hard drives and portable devices, or browse through them all simultaneously.

Control4 works with tens of thousands of consumer electronic devices from the world's leading brands, so you can count on your smart home OS communicating with and controlling virtually all of your favorite devices from a single remote with ease. When you're ready for more control, add a thermostat, smart lock or lighting to your family room or home theater.

Whether it's the new, luxurious Neeo remote or the classic, tactile Control4 SR-260, easily manage your favorites electronics and streaming services from the same handheld device.

High-Definition **MULTI-ROOM VIDEO**

Video in every room, clean and clutter-free

Enjoy beautiful, 4K high-definition video in every room without the jumble of cables behind the TV, bulky components and a table full of remotes. With multi-room video, everyone can enjoy the same movie or watch what they want in any room of the house. Share your entire movie library, and stream video and satellite channels throughout the home without the need for additional video sources in each room. And the simple, elegant design of our interfaces, from remotes to wall or tabletop touchscreens, fits perfectly with any décor.

Multiply your entertainment options

With Control4, you can distribute 10 HDMI sources (satellite/cable boxes, streaming media, media players or gaming devices) to 10 video display locations with full 4K HD clarity, all in a centralized, out-of-sight location.

8" and 10" Tabletop TouchScreens are sleek, portable devices giving you dedicated control over all your entertainment—a device that matches the beauty of your home.

A Smarter Way **TO STREAM**

Built-in music services with every system

Enjoy access to millions of songs, playlists, podcasts and radio stations through popular streaming services such as Spotify, Deezer, Napster, Pandora, TIDAL and TuneIn—already included in every system, and with the ability to add dozens more of your favorite music services. For even greater expansion of your audio streaming options, ShairBridge gives you access to your personal library of music using any iOS device. Even guests can stream their own music through your home.

Greater accessibility for your acoustics

Fire up your playlist on the patio, right from the smartphone in your pocket. Enjoy always-on convenience from the touchscreen in the kitchen. Even start, stop and skip music from a keypad on the wall. Control4 is changing the way you access and experience the music in your home.

High-Resolution **MULTI-ROOM AUDIO**

Listen here, listen there

Every member of your family can listen to and control the tunes they want, from wherever they are in the home. Play the same playlist throughout the entire house or let family members choose their own music in their own rooms, using their own smartphones or tablets. Even manage the volume and start, stop, or skip music, quickly and easily with a single press on a configurable keypad.

Discover the difference

Anyone with an affinity for music will appreciate the premium clarity and immersiveness of Triad multi-room audio. High-resolution audio comes standard on every new system, so you can indulge in the greatest of sound just as the artist intended.

Entertainment Solution Products

Controllers

As the brain of your smart home, the controller manages your home automation system, creating seamless integration of your devices. Everything works together—from lighting and climate control, to 4K high-definition video and high-resolution music, to door locks and security systems. Depending on the size of your home or the scope of your project, you can start with a one-room solution and build on over time, or go big out of the gates and automate the entire house. Your dealer will help determine the best controller to suit your smart home needs.

Amplifiers and Receivers

Deliver high-quality, high-resolution audio to up to eight stereo zones. Regardless of the size of your home or project, you'll enjoy lots of power for your multi-room audio system.

Matrix Switches

Matrix switches deliver world-class distribution of your source material to every room in your home. 4K Ultra HD products feature HDCP 2.2 compliance, making them compatible with current and future 4K content to let you enjoy copy-protected 4K content on every TV throughout the house.

Networking

A strong network is the foundation of any connected home. Arknis and Pakedge provide a complete portfolio of networking products to handle any installation requirements. Wireless devices, routers and switches handle significant streams of high-bandwidth traffic, so whatever connected devices you bring into your home, you can rest assured they'll perform just as they should.

Arknis and Pakedge switches and access points come with built-in OvrC remote management, allowing you or your Pro to remotely manage your home network from anywhere in the world.

Touchscreens

T4 Touchscreens provide dedicated, responsive and elegant control of your home. Featuring a gorgeous, low-profile design with edge-to-edge glass and stunning, high-resolution graphics, these touchscreens look amazing on any wall or surface in your home and are instantly available whenever you need them.

Remotes

The Neco Remote and Control4 SR-260 remotes are the perfect hand-held interfaces to the whole home. Controls audio and video equipment, along with lights, music, temperature, shades, and more. These beautiful remotes feel good in the hand, have an intuitive button layout perfect for one-handed operation, and are highly customizable. You can even add control of shades, thermostats, door locks and more.

Configurable Keypads

Control4 Keypads provide a stunning interface for your Control4 Smart Home system, combining flexible button configuration with beautiful aesthetics to complement the decor of your home. With the simple press of a button, you can activate a scene, allowing events to happen simultaneously.

Control4 App

The Control4 App and an active 4Sight subscription enables total control of your smart home right from your mobile device. Adjust thermostats, raise the shades, activate door locks, check-in on cameras, and so much more. Where you go, your home goes. You can even receive important notifications about the status of your system, such as “Garage door open” or “Water leak detected.”

Voice Control

Using Amazon Alexa or Google Assistant, you can control a specific device, a few devices simultaneously, or your entire Control4 Smart Home with just your voice.

Voice control is an easy and convenient way for anyone in the house to interact with your smart home. The commands are simple and natural. For example, “Alexa, turn on family room TV” or “Hey Google, dim the theater lights to 40%.”

The Control4 Difference

Control4 is the largest home automation provider in the world. We rigorously train and certify our global network of independent, authorized dealers to design and install customized smart home systems for new construction or retrofit projects. With Control4 scalability, no project is too small or too big. Your system grows with your needs.

With support for tens of thousands of devices from over 300 brands, only Control4 can create immersive entertainment experiences, personalized to exactly how you live.
